

## Your telephone .....

1

- 1 Sub-display <sup>(1)</sup>
- 2 Volume up
- 3 Play/Pause key
- 4 Volume down
- 5 Left softkey
- 6 Answer/Send call
- 7 Voicemail
- 8 Right softkey
- 9 Switch on/Switch off
- End call

<sup>(1)</sup> Depending on your network operator.<sup>(2)</sup> Display events (call, SMS, MMS, alarm...) or current status.OT-660A  
ALCATEL  
mobile phones

## 6 Messages .....

### 6.1 Create message

From the main menu select "Messages" to create text/multimedia message. You can type a message and you can also modify a predefined message in Templates or customize your message by adding pictures, photos, sounds, titles, etc (only available while editing a MMS). While writing a message, select "Options" to access all the messaging options. You can save your messages that you send often to Drafts or Templates (MMS only).

### 6.2 Inbox

All received messages (read and unread) are stored in the same inbox.

## 7 My settings.....

From the main screen, select the icon menu and select the function of your choice in order to customize your telephone: Color, Theme, Clamshell, Equalizer, Display, Clock, Keys, More settings....

## 8 Tools .....

### 8.1 Bluetooth

Access this feature by selecting "Tools" from the main menu, then "Bluetooth".

### 8.2 Organizer

Once you enter this menu from "Tools", there is a monthly-view calendar for you to keep track of important meetings, appointments, etc. Days with events entered will be marked in color.

### 1.1 Keys

- Navigation key  
Confirm an option (press the middle of the key)
- Access slide show and music player (long keypress)
- Answer
- Send a call
- Access call memory (Redial) (short keypress)
- Access events (long keypress)
- Switch on/Switch off the telephone (long keypress)
- End call
- Return to the main screen
- Left softkey
- Right softkey
- Access your voicemail (long keypress)
- In Edit mode:
  - Short keypress: change input methods
  - Switch from T9 predictive mode to Normal mode
  - Long keypress: access the Symbols table
- In Edit mode:
  - Short keypress: access the language list
  - Long keypress: enter zero
- From main screen
  - Short keypress: #
  - Long keypress: activate/deactivate the vibrator
- In edit mode:
  - Short keypress: (space)
  - Long keypress: add a word
- Short keypress: Play/pause music, Radio off.
- Long keypress: Lock/Unlock the side keys (flip off).
- Short keypress: Previous/next song (in the playing mode)
- Previous/next channel (Radio on)
- Long keypress: Volume up/down

### 1.2 Main screen icons

- Battery charge level
- Vibrate alert: your phone vibrates, but neither rings nor beeps except for the alarms.
- Bluetooth status (Blue - Activated).
- Bluetooth status (Connected to an audio device).
- Headset connected.
- Call forwarding activated: your calls are forwarded.
- Alarm clock programmed.
- Level of network reception.
- Voicemail message arrived.
- Unanswered calls.
- WAP alerts <sup>(1)</sup>.
- Roaming.
- Memory card scanning in progress.
- Memory card scanning completed.
- Line switching <sup>(1)</sup>: indicates the selected line.
- GPRS connection status (Blue - Activated).
- Shown only in no ciphering mode while calling, sending/receiving SMS.
- Multimedia player active.
- USB cable connected.
- Reception of a message in progress.
- Sending a message.
- Silence mode: your phone neither rings, beeps nor vibrates except for the alarms.
- Message unread
- Message list is full: your terminal cannot accept any new messages. You must access the message list and delete at least one message on your SIM card.
- Antenna off mode.
- A2DP connected.

## 2 Getting started .....

### 2.1 Set-up

#### Removing and installing the back cover

#### Installing and removing the battery

#### Inserting and removing the SIM Card

Place the SIM card with the chip facing downwards and slide it into its housing. Make sure that it is correctly inserted. To remove the card, press it and slide it out. Please power off your phone before you remove the SIM card.

### 2.2 Power on your phone

Hold down the key until the telephone powers on.

### 2.3 Power off your phone

Hold down the key from the main screen.

3

## 3 Calls .....

### 3.1 Making a call

Dial the desired number then press the key to place the call. If you make a mistake, you can delete the incorrect digits by pressing the right softkey.

To hang up the call, press the key.

#### Making an emergency call

If your phone is covered by the network, dial emergency number and press the key to make an emergency call. This works even without a SIM card and without typing the PIN code or unlocking the keypad.

### 3.2 Calling your voicemail <sup>(1)</sup>

To access your voicemail, hold down the key.

### 3.3 Receiving a call

When you receive an incoming call, press the key to talk and then hang up using the key.

### 3.4 Available functions during the call

During a call, you can use your directory, your diary, short messages, etc. without losing your correspondent by pressing the key.

## 4 Call register .....

### 4.1 Call memory

You can access your call memory by pressing the key from the main screen.

### 4.2 Events

By holding down the key from main screen or accessing from main menu, it allows you to view a list of your all latest 20 events (SMS, MMS, WAP Alerts, Voicemail and unanswered calls).

### 4.3 Billing

You can access different items with this option: Amount, Duration, GPRS counter, Beep duration.

### 4.4 Call settings

You can access a number of items with this option: Call waiting, Call forwarding, Call barring, Caller ID, Line switching, Auto redial.

## 5 Directory .....

### 5.1 Consulting your directory

To access the directory from the main screen, press the key or press the key and select the icon from the menu.

### 5.2 Creating a file

Select the directory in which you wish to create a file, press the "Options" softkey, select "Create file" then .

## 13 Games & Applications .....

Your Alcatel phone may include <sup>(1)</sup> some Java™ applications and games. You can also download new applications and games to your phone.

## 14 Profiles .....

With this menu, you may personalise ringtones for different events and environments.

## 15 Making the most of your cellphone .....

## Safety and use .....

We recommend that you read this chapter carefully before using your cellphone. The manufacturer disclaims any liability for damage, which may result as a consequence of improper use or use contrary to the instructions contained herein.

### TRAFFIC SAFETY:

Given that studies show that using a cellphone while driving a vehicle constitutes a real risk, even when the hands-free kit is used (car kit, headset...), drivers are requested to refrain from using their cellphone when the vehicle is not parked. Check the laws and regulations on the use of wireless telephones and their accessories in the areas where you drive. Always obey them. The use of these devices may be prohibited or restricted in certain areas.

When driving do not use your cellphone and headphone to listen to music or to the radio. Using a headphone can be dangerous and forbidden in some areas.

When switched on, your cellphone emits electromagnetic waves that can interfere with the vehicle's electronic systems such as ABS anti-lock brakes or airbags. To ensure that there is no problem:

- do not place your cellphone on top of the dashboard or within an airbag deployment area,
- check with your car dealer or the car manufacturer to make sure that the car's electronic devices are shielded from cellphone RF energy.

### CONDITIONS OF USE:

You are advised to switch off the cellphone from time to time to optimize its performance.

Switch the cellphone off before boarding an aircraft to avoid prosecution.

Switch the cellphone off when you are in health care facilities, except in designated areas. As with many other types of equipment now in regular use, cellphones can interfere with other electrical or electronic devices, or equipment using radio frequency.

Switch the cellphone off when you are near gas or flammable liquids. Strictly obey all signs and instructions posted in a fuel depot, gas station, or chemical plant, or in any potentially explosive atmosphere.

When the cellphone is switched on, it should be kept at least 15 cm from any medical device such as a pacemaker, a hearing aid or insulin pump. In particular when using the cellphone you should hold it against the ear on the opposite side to the device, if any.

To avoid hearing impairment, answer the call before holding your cellphone to your ear. Also move the handset away from your ear while using the "hands-free" option because the amplified volume might cause hearing damage.

Do not let small children use your cellphone without supervision.

When replacing the cover please note that your cellphone may contain substances that could create an allergic reaction.

Always handle your cellphone with care and keep it in a clean and dust-free place.

Do not allow your cellphone to be exposed to adverse weather or environmental conditions (moisture, humidity, rain, infiltration of liquids, dust, sea air, etc.). The manufacturer's recommended operating temperature range is -10°C to +55°C (the max value depends on device, materials and housing paint/texture).

Over 55°C the legibility of the cellphone's display may be impaired, though this is temporary and not serious.

Do not open or attempt to repair your cellphone yourself.

Do not drop, throw or try to bend your cellphone.

Do not paint it.

Use only batteries, battery chargers, and accessories which are recommended by TCT Mobile Limited and its affiliates and are compatible with your cellphone model. TCT Mobile Limited and its affiliates disclaim any liability for damage caused by the use of other chargers or batteries.

Your cellphone should not be disposed of in a municipal waste. Please check local regulations for disposal of electronic products.

Remember to make back-up copies or keep a written record of all important information stored in your cellphone.

Some people may suffer epileptic seizures or blackouts when exposed to flashing lights, or when playing video games. These seizures or blackouts may occur even if a person never had a previous seizure or blackout. If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult your doctor before playing video games on your cellphone or enabling a flashing-lights feature on your cellphone. Parents should monitor their children's use of video games or other features that incorporate flashing lights on the cellphones. All persons should discontinue use and consult a doctor if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. To limit the likelihood of such symptoms, please take the following safety precautions:

- Do not play or use a flashing-lights feature if you are tired or need sleep.
- Take a minimum of a 15-minute break hourly.
- Play in a well lit environment.
- Play at the farthest distance possible from the screen.

When you play games on your cellphone, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. Follow these instructions to avoid problems such as tendinitis, carpal tunnel syndrome, or other musculoskeletal disorders:

- Take a minimum of a 15-minute break every hour of game playing.
- If your hands, wrists, or arms become tired or sore while playing, stop and rest for several hours before playing again.
- If you continue to have sore hands, wrists, or arms during or after playing, stop the game and see a doctor.

Prolonged exposure to music at full volume on the music player may cause the listener's hearing impairment. Adjust the volume before placing headphones on or in your ear. Only use headphones recommended by TCT Mobile Limited and its affiliates.

### PRIVACY:

Please note that you must respect the laws and regulations in force in your jurisdiction or other jurisdiction(s) where you will use your cellphone regarding taking photographs and recording sounds with your cellphone. Pursuant to such laws and regulations, it may be strictly forbidden to take photographs and/or to record the voices of other people or any of their personal attributes, and reproduce or distribute them, as this may be considered to be an invasion of privacy.

It is the user's sole responsibility to ensure that prior authorization be obtained, if necessary, in order to record private or confidential conversations or take a photograph of another person; the manufacturer, the seller or vendor of your cellphone (including the operator) disclaim any liability which may result from the improper use of the cellphone.

### BATTERY AND ACCESSORIES:

Before removing the battery from your cellphone, please make sure that the cellphone is switched off.

Observe the following precautions for battery use:

- Do not attempt to open the battery (due to the risk of toxic fumes and burns).
- Do not puncture, disassemble or cause a short-circuit in a battery.
- Do not burn or dispose of a used battery in the garbage or store it at temperatures above 60°C.

Batteries must be disposed of in accordance with locally applicable environmental regulations. Only use the battery for the purpose for which it was designed. Never use damaged batteries or those not recommended by TCT Mobile Limited and/or its affiliates.

 This symbol on your cellphone, the battery and the accessories means that these products must be taken to collection points at the end of their life:

- Municipal waste disposal centers with specific bins for these items of equipment.
- Collection bins at points of sale.

They will then be recycled, preventing substances being disposed of in the environment, so that their components can be reused.

### In European Union countries:

These collection points are accessible free of charge. All products with this sign must be brought to these collection points.

### In non European Union jurisdictions:

Items of equipment with this symbol are not be thrown into ordinary bins if your jurisdiction or your region has suitable recycling and collection facilities; instead they are to be taken to collection points for them to be recycled.

In the United States you may learn more about CTIA's Recycling Program at [www.recyclewirelessphones.com](http://www.recyclewirelessphones.com)

**CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS**

### CHARGERS

Home A.C. chargers will operate within the temperature range of 0°C to 40°C. The chargers designed for your cellphone meet with the standard for safety of information technology equipment and office equipment use. Due to different applicable electrical specifications, a charger you purchased in one jurisdiction may not work in another jurisdiction. They should be used for this purpose only.

**Characteristics of power supply (depending on the country):**

Travel charger: Input: 100-240V, 50/60 Hz, 0.15 A

Output: 5V, 500 mA

Battery: Lithium 750 mAh

### RADIO WAVES:

**THIS CELLPHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.**

Your cellphone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio-frequency (RF) energy. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. These guidelines include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health.

The exposure standard for cellphones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by public authorities such as the Federal Communications Commission of the US Government (FCC), or by Industry Canada is 1.6 W/kg averaged over 1 gram of body tissue. Tests for SAR are conducted using standard operating positions with the cellphone transmitting at its highest certified power level in all tested frequency bands.

Although the SAR is determined at the highest certified power level, the actual SAR level of the cellphone while operating can be well below the maximum value. This is because the cellphone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output of the cellphone. Before a cellphone model is available for sale to the public, compliance with national regulations and standards must be shown.

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

For the receiver devices associated with the operation of a licensed radio service (e.g. FM broadcast), bear the following statement:

This device complies with Part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

For other devices, they bear the following statement:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference

(2) this device must accept any interference received, including interference that may cause undesired operation.

Your cellphone is equipped with a built-in antenna. For optimal operation, you should avoid touching it or degrading it.

As cellphone devices offer a range of functions, they can be used in positions other than against your ear. In such circumstances the device will be compliant with the guidelines when used with headset. If you are not using headset ensure that whatever product is used is free of any metal and that it positions the phone at least 2 cm away from the body.

## General information .....

• **Website:** [www.alcatel-mobilephones.com](http://www.alcatel-mobilephones.com)

• **Hot Line Number:** see "TCT Mobile Services" leaflet or go to our Internet site.

On our Internet site, you will find our FAQ (Frequently Asked Questions) section. You can also contact us by e-mail to ask any questions you may have.

An electronic version of this user guide is available in English and other languages according to availability on our server: [www.alcatel-mobilephones.com](http://www.alcatel-mobilephones.com)

Your cellphone is a transceiver that operates on GSM networks with 850 and 1900 MHz bands.

### Protection against theft (1)

Your cellphone is identified by an IMEI (cellphone serial number) shown on the packaging label and in the product's memory. We recommend that you note the number the first time you use your cellphone by entering \*#06# and keep it in a safe place. It may be requested by the police or your operator if your cellphone is stolen. This number allows your cellphone to be blocked preventing a third person from using it, even with a different SIM card.

### Disclaimer

There may be certain differences between the user manual description and the cellphone's operation, depending on the software release of your cellphone or specific operator services.

### I cannot access my voicemail

• Make sure your operator's voicemail number is correctly entered in "My Numbers"

• Try later if the network is busy

### I am unable to send and receive messages MMS, Vox MMS

• Check your phone memory available as it might be full

• Contact your network operator to check service availability and check MMS parameters

• Verify the server center number or your MMS profile with your operator

• The server center may be saturated; try again later

### The icon is displayed on my standby screen

• You have saved too many short messages on your SIM card; delete some of them or archive them in the product memory

### "No service" is displayed

• You are outside of the network coverage area

### I have already entered 3 incorrect PIN codes

• Contact your network operator to obtain the PUK code (Personal Unblocking Key)

### I am unable to connect my telephone to my computer

• Install first of all Alcatel's PC suite

• Use "Install the connection" and perform the installation

• Check that your computer meets the requirements for Alcatel's PC Suite installation

### I am unable to download new files

• Check for free space

• Delete some files

• Select the MicroSD Card to store the files you downloaded

• Check your subscription status with your operator

### The phone can't be detected by others via Bluetooth

• Make sure that Bluetooth is turned on and your cellphone is visible to other users

## Telephone warranty .....

Congratulations on choosing this cellphone - we hope that you will be completely satisfied with it.

Your cellphone is guaranteed against any deviation from technical specifications for a period of twelve (12) months from the date specified on your original invoice, subject to any other specific provisions (1).

The warranty terms defined in the manual also apply to the battery and accessories sold with the cellphone but for a period of six (6) months (2) from the date of purchase shown on your original invoice.

Under the terms of this warranty, you must immediately inform your vendor (or any repair centre approved by TCT Mobile Limited or its affiliates, which are listed on our website: <http://www.alcatel-mobilephones.com>) in case of a conformity defect on your cellphone, and present the invoice given to you at the time of purchase. The vendor or repair centre will decide whether to replace or repair, as appropriate, all or any part of the cellphone or accessory found to be defective; this warranty covers the cost of parts and labour but excludes any other costs. Repair or replacement may be carried out using reconditioned components offering equivalent functionality.

Servicing under the terms of this warranty, especially repair, modification or replacement of products, shall entitle to a ONE (1) month warranty unless there are statutory provisions to the contrary. This warranty shall not apply to damage or defects to your cellphone and/or accessory caused by:

- 1) not following the instructions for use or installation,

(1) The mandatory warranty period may vary if overriding statutory provisions are applicable in your jurisdiction.

(2) The life of a rechargeable cellphone battery in terms of conversation time, standby time, and total service life, will depend on the conditions of use and network configuration. Batteries being considered expendable supplies, the specifications state that you should obtain optimal performance for your cellphone during the first six months after purchase and for approximately 200 more recharges.

## Troubleshooting .....

Before contacting the aftersales department, you are advised to follow the instructions below:

- You are advised to switch off the telephone from time to time to optimize its performance.
- You are advised to fully charge () the battery for optimal operation.
- Avoid storing large amounts of data in your telephone as this may affect the performance of your telephone.
- and carry out the following checks:

### My cellphone will not switch on

- Press  until the screen comes on
- Check the battery charge level

• Check the battery contacts, remove and reinstall your battery, then turn your telephone back on

### My phone has not responded for several minutes

- Press  key
- Remove the battery and re-insert it, then switch the phone back on

### My screen is difficult to read
